EXPERIENCE

Polymath Labs, USA — *Software Developer*

Sep 2021 - March 2022

- Redesigned Polymaths website with Bootstrap only CSS
- Refactored the Polymaths website and insured a clean and easily maintainable website
- Helped during rebranding Polymaths from Polymathlabs
- Developed different Bootstrap theme to be used across different Polymaths client web apps
- Transformed Polymaths website from static React components to dynamic React components with Contentful
- Contributed to internal React-based npm libraries

Website: <https://www.polymaths.com>

Sketish, India — *Software Developer*

Nov 2020 - Jun 2020

- Worked as React frontend developer for different internal products
- Lead a team of 5 frontend developers
- Introduced PR reviews, Giit branches, and other version control best practices
- Refactored, added new features, fixed bugs on their React, Redux based frontend app
- Peirodically deployed updates with Firebase hosting

Website: <https://ecomexperts.io>

Ecom Experts, Canada — *Software Developer*

May 2020 - August 2020

- Customize Shopify theme for different stores in US and CANADA
- Identify problems with client's stores and suggest solutions
- Helped teammates with Jquery and Javascript related tasks

Website: <https://ecomexperts.io>

Andela, Kigali — *Software Developer*

JANUARY 2019 - APRIL 2020

- Worked with a variety of languages and modern frameworks such as ReactJS, Redux, Angular, NodeJS, ExpressJs, Mocha and Chai, Jest, Sengrid, PostgreSQL
- Worked on a project called Author's haven. A full-stack project which helps authors write articles of any length.
- My day-to-day activity at Andela involved implementing new features, writing units, integration tests, and code refactoring.
